

Paediatric Nasal Cannulae

Paediatric Nasal Cannulae shown are:

- Anatomically curved to securely fit the upper lip, with tapered nasal prongs for comfort, allowing for longer term use
- Discreet with over the ear style headset fitting
- Made of soft, lightweight, clear material (three channel crush resistant tubing)

The 1610 Cannula: Premature (108001)

- A single lumen cannula delivers uninterrupted flow rates of up to 3 litres per minute
- Supplied in a length of 2.1 metres (7ft)
- Suitable for premature – less than term
